Environmental Management Plan

Document ID: APEL-HSE-312 | Owner: HSE | Revision: 3.6

This page contains the controls and records specific to environmental aspects.

Environmental aspects

- Air emissions
- Wastewater
- Hydrocarbon spills
- Solid waste
- Noise
- Chemical storage

Monitoring

This page contains the controls and records specific to monitoring.

Monitoring

- Stack parameters
- Effluent quality
- Tank-area inspection
- Waste manifests
- Spill observations

Spill response

This page contains the controls and records specific to spill response.

Spill response

- Stop source if safe
- Protect drains
- Deploy containment
- Notify HSE
- Record event

Waste management

This page contains the controls and records specific to waste management.

Waste management

- Segregate waste
- Label containers
- Use approved handlers
- Retain manifests

Improvement

This page contains the controls and records specific to improvement.

Improvement

- Track recurring leaks
- Review waste trends
- Improve containment
- Train affected teams
