Sovereign On-Premise Agentic AI Workbench User Manual

Document ID:	APEL-MAN-IT-401	**Effective Date:**	2026-08-01
Revision:	1.0	**Classification:**	CONFIDENTIAL - STRICT PROPRIETARY
Department:	Information Technology & AI Systems	**Site Location:**	Jamnagar Refinery Complex (JRC)

1. System Overview

The Sovereign AI Workbench provides air-gapped, zero-cloud confidential artificial intelligence capabilities for refinery engineering, maintenance analysis, and operational decision support.

2. Agentic Workflow Capabilities

- Multi-document reasoning across equipment history, NDT inspection logs, and real-time telemetry.
- Automated generation of formal engineering approval notes, MOC requests, and inspection summaries.
- Cross-referencing anomalous sensor trends with historical failure modes (FMEA library).

3. User Interaction & Prompting Guidelines

Engineers should provide specific asset tags (e.g., P-102, C-301) and timeframe boundaries to maximize RAG retrieval precision.
