Mechanical Integrity Manual

Document ID: APEL-MAN-302 | Owner: Inspection & Integrity | Revision: 5.1

The integrity framework section contains subject-specific guidance.

Integrity framework

- Design basis
- Inspection evidence
- Operating history
- Maintenance history
- Consequence and criticality

Criticality

The criticality section contains subject-specific guidance.

Criticality

- HIGH assets receive priority review.
- Criticality does not define a pressure limit.
- Risk decisions require evidence.

Inspection evidence

The inspection evidence section contains subject-specific guidance.

Inspection evidence

- Asset ID
- Date
- Method
- Location
- Measured value
- Inspector
- Instrument ID

Assessment boundary

The assessment boundary section contains subject-specific guidance.

Assessment boundary

- Threshold comparison can trigger engineering assessment.
- Screening is not a formal fitness-for-service conclusion.
- AI should state limitations.

Recommendation quality

The recommendation quality section contains subject-specific guidance.

Recommendation quality

- Describe condition.
- Cite evidence.
- Name owner.
- State required review.
- Identify uncertainty.
