Process Safety Management (PSM) & Risk Governance Manual

Document ID:	APEL-MAN-HSE-302	**Effective Date:**	2026-08-01
Revision:	3.5	**Classification:**	CONFIDENTIAL - STRICT PROPRIETARY
Department:	HSE & Technical Safety	**Site Location:**	Jamnagar Refinery Complex (JRC)

1. Fourteen PSM Elements

Comprehensive adherence to OSHA 1910.119 and CCPS process safety framework across all hydrocarbon processing units.

2. Management of Change (MOC) Mandatory Triggers

- Any change to equipment metallurgy, impeller trim, or seal design (e.g., P-102 wear ring modifications).
- Modification of alarm setpoints or safety interlock logic in DCS/SIS.
- Changes to crude feed blend specifications outside baseline crude assay limits.

3. Mechanical Integrity & Proof Testing

All critical safety instrumented functions (SIF) must undergo annual full-loop proof testing from field sensor to final shutdown valve.
