Sovereign AI Workbench Operations Manual

Document ID: APEL-MAN-305 | Owner: IT / AI Governance | Revision: 2.0

The platform services section contains subject-specific guidance.

Platform services

- Local model serving
- Document ingestion
- OCR
- Vector retrieval
- Agent orchestration
- Sandbox
- Artifact generation

Knowledge lifecycle

The knowledge lifecycle section contains subject-specific guidance.

Knowledge lifecycle

- Classify
- Extract
- Chunk
- Embed
- Index
- Retrieve
- Cite

Agent execution

The agent execution section contains subject-specific guidance.

Agent execution

- Plan
- Select model/tools
- Retrieve evidence
- Execute tools
- Verify
- Generate artifact
- Request approval

Security controls

The security controls section contains subject-specific guidance.

Security controls

- Network restriction
- Tool allow-list
- Sandbox isolation
- Audit logging
- Role-based access

Operations monitoring

The operations monitoring section contains subject-specific guidance.

Operations monitoring

- GPU
- VRAM
- Inference latency
- Indexing queue
- Tool failures
- Storage
