Production Planning Procedure

Document ID: APEL-OPS-251 | Owner: Operations | Revision: 3.5

This page contains the controls and records specific to planning inputs.

Planning inputs

- Crude availability
- Tank inventory
- Unit availability
- Maintenance windows
- Product demand
- Utility constraints

Unit constraints

This page contains the controls and records specific to unit constraints.

Unit constraints

- CDU throughput
- Furnace duty
- Cooling-water margin
- Hydrogen availability
- Tank capacity

Daily coordination

This page contains the controls and records specific to daily coordination.

Daily coordination

- Production target
- Equipment constraints
- Planned outages
- Open priority work
- Risk decisions

Plan changes

This page contains the controls and records specific to plan changes.

Plan changes

- Reason
- Affected unit
- Duration
- Responsible manager
- Operational constraints

Management reporting

This page contains the controls and records specific to management reporting.

Management reporting

- Planned vs actual throughput
- Unplanned downtime
- Major constraints
- Open risks
- Deferred maintenance impact
