Controlled Document Management Policy

Document ID: APEL-DOC-103 | Owner: Document Control | Revision: 5.6

This page contains the policy-specific controls for lifecycle.

Lifecycle

- DRAFT
- UNDER REVIEW
- APPROVED
- ACTIVE
- SUPERSEDED
- WITHDRAWN

Revision control

This page contains the policy-specific controls for revision control.

Revision control

- Every revision records the change reason.
- Author and reviewer are captured.
- Technical changes require subject-matter review.
- Document ID remains stable across revisions where appropriate.

Active authority

This page contains the policy-specific controls for active authority.

Active authority

- ACTIVE is the normal current procedural authority.
- Historical questions may retrieve SUPERSEDED versions.
- Conflicting active documents are escalated for resolution.

Distribution

This page contains the policy-specific controls for distribution.

Distribution

- Copies retain document ID and revision.
- Printed copies require visible status.
- External distribution is controlled by the owner.

Review triggers

This page contains the policy-specific controls for review triggers.

Review triggers

- Scheduled review
- Process modification
- Incident learning
- Equipment change
- Regulatory or governance change
