Process Safety Manual

Document ID: APEL-MAN-304 | Owner: HSE | Revision: 4.7

The barrier philosophy section contains subject-specific guidance.

Barrier philosophy

- Design controls
- Alarms
- Interlocks
- Relief systems
- Procedures
- Human response

Management of change

The management of change section contains subject-specific guidance.

Management of change

- Equipment replacement
- Control-logic change
- Operating-limit change
- Chemical change

Alarm management

The alarm management section contains subject-specific guidance.

Alarm management

- Alarms should be actionable.
- Nuisance alarms are investigated.
- Stale alarms are removed through controlled change.

Emergency systems

The emergency systems section contains subject-specific guidance.

Emergency systems

- Emergency shutdown
- Fire detection
- Gas detection
- Relief devices
- Emergency communications

Learning

The learning section contains subject-specific guidance.

Learning

• Incident lessons can change procedures.

• Near misses can change inspection focus.

• Recurring barrier failures require management review.
