Refinery Operations Manual

Document ID: APEL-MAN-303 | Owner: Operations | Revision: 6.8

The crude receipt section contains subject-specific guidance.

Crude receipt

- Tank level
- Transfer pressure
- Water draw-off
- Pump availability
- Quality verification

Atmospheric distillation

The atmospheric distillation section contains subject-specific guidance.

Atmospheric distillation

- Furnace outlet temperature
- Column pressure
- Reflux
- Stripping steam
- Feed rate

Utilities

The utilities section contains subject-specific guidance.

Utilities

- Steam
- Cooling water
- Electrical power
- Instrument air
- Fuel gas

Abnormal operation

The abnormal operation section contains subject-specific guidance.

Abnormal operation

- Verify indication where practical.
- Reduce process stress using approved procedures.
- Notify shift supervisor.
- Protect people and equipment.

Production reporting

The production reporting section contains subject-specific guidance.

Production reporting

- Throughput
- Constraints
- Equipment outages
- Major maintenance
- Open operational risks
