Data Classification and Handling Policy

Document ID: APEL-SEC-102 | Owner: IT Security | Revision: 6.1

This page contains the policy-specific controls for classification levels.

Classification levels

• PUBLIC — approved for unrestricted release.

• INTERNAL — normal business use.

• CONFIDENTIAL — sensitive technical, commercial or management information.

• RESTRICTED — highest sensitivity and explicit authorization.

Examples

This page contains the policy-specific controls for examples.

Examples

- Inspection reports and engineering calculations are CONFIDENTIAL.
- Vendor quotations are CONFIDENTIAL.
- Security architecture may be RESTRICTED.
- Approved public brochures may be PUBLIC.

Labeling

This page contains the policy-specific controls for labeling.

Labeling

- Controlled records carry classification metadata.
- Document IDs and revisions remain attached during export.
- The AI system uses classification as a retrieval filter.

Sharing

This page contains the policy-specific controls for sharing.

Sharing

- Recipients must be authorized for the classification.
- Users must not paste confidential material into public AI services.
- Removing a label does not change the underlying sensitivity.

Governance

This page contains the policy-specific controls for governance.

Governance

- Document owners assign classification.
- Classification is reviewed during revision or when business sensitivity changes.
- Unknown or contradictory classification should be flagged, not guessed.
