SOP — Engineering Technical Review

Document ID: APEL-SOP-ENG-241 | Owner: Process Engineering | Revision: 6.2

This page defines the task-specific controls for review initiation.

Review initiation

- Process deviation
- Equipment condition
- Design question
- Reliability concern
- Change proposal

Evidence categories

This page defines the task-specific controls for evidence categories.

Evidence categories

- Measured
- Calculated
- Third-party reported
- Inferred
- Unknown

Calculation practice

This page defines the task-specific controls for calculation practice.

Calculation practice

- Expose inputs.
- Show units.
- Show intermediate steps.
- State assumptions.
- Enable independent checking.

Conflict handling

This page defines the task-specific controls for conflict handling.

Conflict handling

- Check authority.
- Check revision/status.
- Check applicability.
- Record unresolved conflict.
- Never average engineering limits.

Review output

This page defines the task-specific controls for review output.

Review output

- Evidence reviewed
- Assessment
- Uncertainty
- Recommendation
- Approval required
- Follow-up
